BRAKE PEDAL

INSPECTION AFTER REMOVAL

- Check brake pedal upper rivet for deformation.
- Make sure that the lapping length of sub-bracket and slide plate is at least 4 mm (0.16 in).
- Check brake pedal for bend, damage, and cracks on the welded parts.
- Replace brake pedal assembly if any non-standard condition is detected.

• Check clevis pin and plastic stopper for damage and deformation. Replace clevis pin if there are.

INSTALLATION

Installation is in the reverse order of the removal. Tightening torques for brake pedal assembly mounting nut and bolt are referred to BR-9 "COMPONENTS". Tightening torque for lock nut (A) is referred to Refer to BR-7 "ADJUSTMENT".

- After installing the brake pedal assembly to the vehicle, adjust the brake pedal. Refer to BR-6 "Inspection and Adjustment".

BR-9

BRAKE FLUID

BRAKE FLUID

On-board Inspection

CHECKING BRAKE FLUID LEVEL

- Make sure the fluid level in the tank is within the standard (between MAX and MIN lines).
- Visually check around the reservoir tank for fluid leakage.
- If fluid level is excessively low, check brake system for fluid leakage.
- Release parking brake lever and see if brake warning lamp goes off. If not, check brake system for fluid leakage.

Drain and Refill

CAUTION:

- Refill with new brake fluid "DOT 3" or "DOT 4".
- Never reuse drained brake fluid.
- Be careful not to splash brake fluid on painted areas; it may cause paint damage. If brake fluid is splashed on painted areas, immediately wipe off them and wash it away with water.
- Before working, disconnect connector of ABS actuator and electric unit (control unit) or the battery cables.

1. Connect a vinyl tube to bleed valve.
2. Depress the brake pedal, loosen the bleed valve, and gradually remove the brake fluid.

3. Clean inside of reservoir tank, and refill with new brake fluid.
4. Loosen bleed valve, depress brake pedal slowly to full stroke and then release it. Repeat the procedure every 2 or 3 seconds until the new brake fluid comes out, then close the bleed valve while depressing the pedal. Repeat the same work for each wheel.
5. Bleed air. Refer to BR-11 "Bleeding Brake System".

BR-10
